SUMMARY

Backend software engineer with 2 years of experience building Python and Java microservices for payments and data platforms. Comfortable owning services from design to production on AWS.

EXPERIENCE

Software Engineer Intern, Northwind Payments | Dallas, TX | May 2025 - Aug 2025

- Built REST APIs in FastAPI for a payment reconciliation service handling 40,000 transactions per day
- Reduced p95 API latency by 35% by adding Redis caching and optimizing PostgreSQL queries
- Containerized 6 services with Docker and deployed them to AWS ECS through a GitHub Actions CI/CD pipeline
- Collaborated with the fraud team to stream risk signals through Kafka, cutting alert delay from 5 minutes to 20 seconds

Software Developer, Brightline Analytics | Bengaluru, India | Jul 2023 - Jul 2024

- Developed Java Spring Boot microservices for a data ingestion platform serving 120 enterprise clients
- Automated ETL jobs with Airflow and SQL, saving the analytics team 10 hours per week
- Wrote unit tests with JUnit and PyTest, raising coverage from 52% to 85%

PROJECTS

Real-Time Fraud Detection API | Python, FastAPI, Kafka, scikit-learn

- Designed an anomaly detection service scoring 1,000 events per second with an isolation forest model
- Deployed on Kubernetes with Terraform-managed AWS infrastructure and Grafana dashboards

EDUCATION

M.S. Information Technology and Management, University of Texas at Dallas | Expected May 2027

B.E. Information Science, Visvesvaraya Technological University | Jun 2023

SKILLS

Languages: Python, Java, SQL, JavaScript

Frameworks: FastAPI, Django, Spring Boot, React

Cloud & DevOps: AWS (EC2, S3, Lambda, ECS), Docker, Kubernetes, Terraform, Git, CI/CD

Data: PostgreSQL, Redis, MongoDB, Kafka, Airflow, Pandas

Concepts: Distributed Systems, Data Structures, Algorithms, System Design
